[LeetCode](#)

OBJECTIVE

AI-focused B.Tech student skilled in Machine Learning, NLP, and backend development using Python and Java. Solved 600+ LeetCode problems with a 5-star Java rating on HackerRank, demonstrating strong problem-solving ability. Experienced in building data-driven ML models and scalable applications. Seeking to apply AI and software skills to real-world challenges.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2023 – 2027

Vel Tech High Tech Dr.Rangarajan Dr.Sakunthala Engineering College

CGPA: 8.54

SKILLS

Languages	Python, Java, SQL, HTML/CSS
Core CS	Data Structures & Algorithms, OOP
Machine Learning	Regression, Classification, Clustering, Model Evaluation, NLP
Data	Pandas, NumPy, Data Preprocessing
Tools	Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Android Studio
Frameworks	Spring Boot

EXPERIENCE

Machine Learning Intern

Oct 2025 – Jan 2026

Cybernaut Edu-Tech, Tamil Nadu

- Completed structured training in Machine Learning, covering data preprocessing, model building, and evaluation.
- Worked on real-world datasets using Python, applying regression and classification techniques.
- Gained hands-on experience with web scraping and deploying ML models using Flask.

PROJECTS

Crime Prevention Using AI

Jan 2024

Tech Stack: Python, Linear Regression

- Developed a crime prediction system analyzing 10,000+ historical crime records to identify high-risk zones.
- Implemented Linear Regression model achieving approximately 82% prediction accuracy.

AI English Tutor

2025

Tech Stack: Python, NLP, Pandas, NumPy

- Developed NLP-based grammar correction system using 5,000+ sentence dataset.
- Achieved around 85% error detection accuracy using preprocessing and tokenization.
- Designed feedback system reducing grammar errors by 30% in test samples.

ACHIEVEMENTS

- Solved 600+ problems on LeetCode and earned 200 and 365-day streak badges.
- Completed NPTEL Certification: Joy of Computing using Python (IIT Madras).
